Bob

Telcon Bill Litson MD referred by Ned Herrmann
(218) 226-4431

Bill Litson evidently had an extended discussion with Ned Herrmann re our work. He has been in general practice and pediatrics over 15 years. During this time he has been doing research on left and right brain function. About 10 years ago he became interested in games, specifically those that can be used on a video set. The games run from children game relating to immunization to executive games relating to stress and tension. One of his games relating to survival in a wilderness area is about ready to be marketed. He is working with Minneapolis Honeywell in Minneapolis on TV programs. He is also working with several executive groups on stress tension. There is also a group from Duluth, Minn. who is working with him on preparing programs for cable TV. From my discussion he would be interested in talking with you about possible joint ventures and how your system can work with his. I am sending him information on our operations since he is unaware of our work. He can be reached at the above number
